PROFESSIONAL SUMMARY

Data Analyst and QA Automation professional with 6+ years of experience in banking and SaaS domains. Strong expertise in SQL, Python, data validation, and reporting. Experienced in analyzing datasets, ensuring data integrity, and supporting data-driven decisions. Seeking a Data Analyst role.

SKILLS

Languages: Python, SQL, Java

Data Tools: MySQL, Power BI, Excel, Pandas, NumPy

Automation: Selenium

Concepts: Data Analysis, Data Validation, ETL, Agile, SDLC

EXPERIENCE

Cognizant Technology Solutions India Pvt. Ltd.

Dec 2018 – Jun 2021

Data Analyst & QA Automation Engineer

Pune, India

- Worked with ABN AMRO Bank on data validation, reconciliation, and reporting using SQL.
- Analyzed large datasets to identify discrepancies and generate business insights.
- Built automated regression test suites using Selenium and Java in Agile environment.
- Improved reporting and testing efficiency through Python-based utilities.

Sprinklr

Jul 2021 – Jan 2025

Senior QA Automation Engineer

Bangalore / India

- Led automation testing for SaaS-based customer experience platform.
- Validated backend data using SQL queries to ensure reporting accuracy.
- Collaborated with analytics and product teams to verify business metrics.
- Analyzed production issues using logs and database queries for root cause analysis.

PROJECTS

Sales Data Analysis & Dashboard (SQL + Power BI)

- Analyzed 50K+ sales records using SQL to identify revenue trends, top-performing products, and regional performance.
- Created complex SQL queries using JOINS, GROUP BY, CTEs, and window functions for KPI calculations.
- Built interactive Power BI dashboard with revenue trends, profit margins, and sales forecasts.
- Performed data cleaning and transformation before visualization.

Customer Churn Analysis (Python + SQL)

- Performed exploratory data analysis (EDA) using Python (Pandas, NumPy, Matplotlib) on customer dataset.
- Identified churn patterns based on tenure, subscription type, and engagement metrics.
- Wrote SQL queries to segment customers and calculate retention metrics.
- Generated insights and recommendations to reduce churn rate.

EDUCATION

MVJ College of Engineering

Aug 2014 – Jun 2018

B.E. in Information Science
