PROFILE

Data Analyst with **6+ years of experience** across banking and SaaS, specializing in **SQL-driven reporting**, **KPI dashboards**, **data validation**, and customer analytics. Strong record of partnering with product, analytics, and engineering teams to improve **reporting accuracy** and operational efficiency.

TECHNICAL SKILLS

Core: SQL, Python, REST APIs, MySQL, Git, Jupyter Notebook, Postman
Analytics: Power BI, Tableau, Excel, pandas, NumPy, Matplotlib, R, KPI reporting
Data Quality: Data validation, KPI auditing, reporting accuracy checks, discrepancy analysis, root cause analysis

PROFESSIONAL EXPERIENCE

Sprinklr Bangalore, India
Senior SDET (Data & Analytics focus) Jul 2021 – Jan 2025

- Designed **SQL-based data quality checks** across Sprinklr's reporting pipelines, identifying discrepancies that caused inaccurate KPI outputs for enterprise customers.
- Led **root cause investigations** on production data anomalies using SQL queries and pattern analysis across **multi-million row datasets**.
- Audited **KPI calculation logic** and validated end-to-end data flows for customer-facing dashboards and SLA reporting.
- Built **Python scripts** to automate recurring validation workflows, reducing manual checks and improving release-cycle reliability.
- Translated investigation findings into actionable reports for product, analytics, and engineering teams.

Cognizant Technology Solutions India Pvt. Ltd. Pune, India
Programmer Analyst | Client: ABN AMRO Bank Dec 2018 – Jun 2021

- Supported banking **data analysis and reporting** for ABN AMRO Bank, using SQL for validation, reconciliation, and KPI reporting.
- Analyzed datasets to identify discrepancies, validate reporting outputs, and improve **data accuracy** for stakeholders.
- Collaborated with business and development teams to validate reporting requirements and data-driven acceptance criteria.

PERSONAL PROJECTS

Sales Data Analysis & Dashboard Jul 2025

- Analyzed **50K+ sales records** using SQL joins, CTEs, and window functions; built a **Matplotlib dashboard** for KPI tracking and sales trend analysis.
- Cleaned, validated, and transformed source data to improve reporting accuracy before dashboard creation.

Telecom Customer Churn Analysis & Power BI Dashboard Nov 2025

- Analyzed IBM Telco Customer Churn data (**7,032 customers**, 21 features) using **Python**, **pandas**, and **SQL** to calculate churn rate, customer tenure patterns, contract risk, and high-risk customer segments.
- Built a **Power BI dashboard** to present churn insights, identifying **26.6% overall churn**, **42.7% churn for month-to-month contracts**, and **53.3% churn in the first 6 months**; recommended targeted onboarding and contract incentives.

EU Job Market Analytics Dashboard Apr 2026

- Built an **automated ETL pipeline** and live analytics dashboard using Python, REST APIs, GitHub Actions, and React to track EU hiring trends, salary benchmarks, remote-work ratios, skill demand, and tech hub clustering.

EDUCATION

B.E. in Information Science Aug 2014 – Jun 2018
MVJ College of Engineering
Relevant coursework: Object-Oriented Programming (OOP), Database Management Systems (DBMS), Data Structures, Software Engineering

CERTIFICATIONS

Google Data Analytics Professional Certificate | *Verify Certificate* April 2026 – October 2026
Comprehensive 8-course series covering data cleaning, SQL aggregations, Tableau dashboards, R programming, and case study.

Python for Data Science, AI & Development October 16, 2025
Strengthened practical Python skills for data analysis, API integration, notebook-based exploration, and automation of recurring analytical workflows.
